

AuroraExpert - Installation and usage

Thank you for choosing to download and install your fully functional trial version of AuroraExpert

About AuroraExpert

Enclosed within the downloaded file you will find the Trend AuroraExpert PC protocol analysis package that you may install onto as many PCs as you wish. Each installation gives you a 30 day period during which you have full use of all of the options available.

Registering and fully activating AuroraExpert

The options available for purchase and priced separately are:

- **OPTION A** - All available ISDN protocols including: ETSI (DSS1), 1TR6, DASS2, DPNSS, Q.SIG, NI2, Nortel, AT&T, VN, TPH1856, TPH1962, CorNet (N/T/TS), TN1R6 (N/T) & X.25 D & B channel
- **OPTION F** - Frame Relay: ANSI T1.617 annex D, ITU-T Q.933 annex A, LMI consortium (Gang of Four) and IETF RFC1490 encapsulation.
- **OPTION V** - Full decode of V5.1 & V5.2 protocols plus encapsulated LAPD.
- **OPTION P** - PPP / IP decode and analysis includes LCP, CCP, PAP, CHAP, BAP, BACP, IPCP, OSINLCP, ATCP plus decoding of RFC1700 PPP headers

You have two choices for converting your 30 day time limited installation into a licensed copy that you can use indefinitely:-

1. If you have already ordered AuroraExpert then you may contact your Trend vendor quoting your **option codes** and the **installation serial number** found on the start-up screen. You will be provided with an Unlock code to license your installed copy.
2. If you have not ordered AuroraExpert then you may order the required protocol options from your Trend vendor by supplying a purchase order along with **protocol options** required and the **installation serial number** found on the start-up screen after installation.

Each licensed installation relates to a single copy on a single PC. This license may be transferred to another PC for hardware upgrade purposes.

Please visit the Trend WEBSITE at www.trendcomms.com for free software updates, application notes, free add-on filter suites, sample protocol traces and product information. We hope that you will benefit from the global support network that we provide to each and every one of our customers.
