xDSL
Copper pair qualification for the new digital age

TrendCommunications

- Measure Noise, Level, Attenuation, Crosstalk and Return loss
- Bandwidth up to 2MHz
- Automatic measurements in Sweep Mode
- Intercom facility

- Noise and Level – a single unit on the line under test
- Attenuation – One generator and one receiver to measure across the frequency spectrum
- Return loss – measure echo signal from impedance mismatching
- Crosstalk – Measure NEXT and FEXT
- Longitudinal balance – Measure balance attenuation using special adaptor
