V5

Comprehensive testing for V5.1 & V5.2 Access Networks

TrendCommunications

- Full Decode of all V5 protocols
 - Prove V5 link performance
- Decode encapsulated ISDN & X.25 frames
 - Analyse user traffic
- Automatic Protocol Scan
 - What is the system configuration?
- Advanced V5 trace filtering
 - Get to the heart of the problem
- Drop any timeslot to third party analysis equipment

- Full Decode of all V5 protocols
 - Prove V5 link performance
- Decode encapsulated ISDN & X.25 frames
 - Analyse user traffic
- AuroraExpert
 - Detailed off line analysis
 - Advanced V5 trace filtering

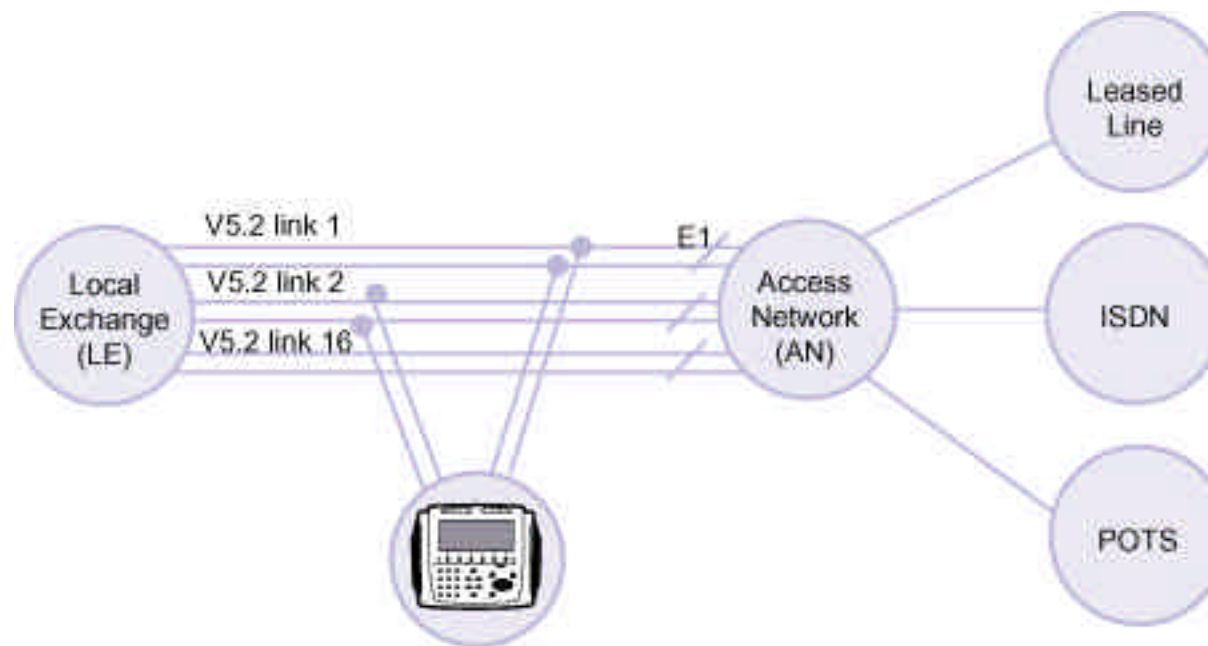

- Simultaneous decode of multiple timeslots
- Dual E1 (or T1) interfaces
- Automatic link protocol scan identification
- Decode of user traffic and encapsulated signalling
- Comprehensive filtering
- G.703/G.704 status and error reporting
- A, Sa5, Sa6 bit decodes to view maintenance signalling

- Full decode of all V5 protocols
- Conforms to latest V5 specifications (Jan 1999)
- Analysis of link start-up procedure
 - includes Sa7 bit decoding for link variant ID

- ISDN monitor support
- Over 15 National, European and Private protocols supported
- Support for all protocols over T1 or E1
- Dual interface capability or mix and match (T1/E1)
